

# SSD Installation Guide for Notebooks

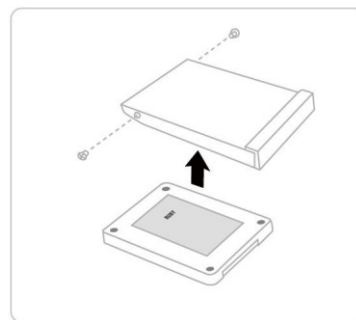

## Step 1.

Before the installation commences, be sure to shut down your Notebook by disconnecting the power cord and remove the battery.

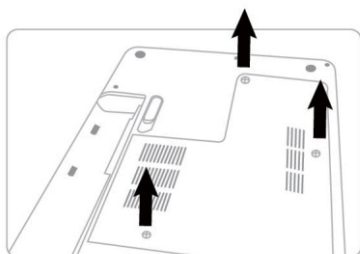

## Step 4.

Attach the drive bracket to your new (SSD) Solid-State Drive. Slide the drive into the bay until fully seated. Make sure to align the SATA plugs and SSD connectors.

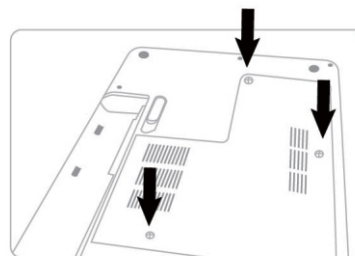

## Step 2.

Locate the hard drive bay on your Notebook and remove screws to remove the casing and slide the existing drive out. Please refer to your owners manual on process for removing the old hard drive

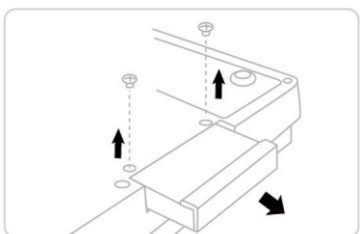

## Step 5.

Replace screws to secure casing.

## Step 3.

Remove bracket from side and set aside.

## Step 6.

Reconnect the power cord and battery. Switch the Notebook on for installation verification.
